Information on Data Protection within the Research Data Repository of FID BAUdigital

The TIB – Leibniz Information Centre for Science and Technology, the Universitätsbibliothek Braunschweig (UBBS), the Universitäts- und Landesbibliothek Darmstadt (ULB) and the Fraunhofer-Informationszentrum Raum und Bau IRB (2020-2023) are partners in the FID BAUdigital project. Within the framework of the DFG funded "Specialised Information Services" programme they are establishing the Specialised Information Service for Civil Engineering, Architecture and Urbanism (FID BAUdigital) as a supra-regional and demand-oriented information infrastructure for science. As part of the project, the TIB is establishing a repository that will enable the publication of research data in the field of Civil Engineering, Architecture and Urbanism.

In order to use the Research Data Repository of FID BAUdigital for data publication, the creation of a user account is required. For this purpose, the specification of a user name and email address is mandatory. Optionally, the full name can also be entered. For data publication, membership of an organisation of your choice is required. Mandatory metadata according to the DataCite Metadata Schema[3] for DOI allocation as well as optional metadata describing the datasets are collected as part of the data publication. These are available under the open licence CC0 1.0 Universal. Your account data will be stored for the duration of your use of the Research Data Repository. If you no longer wish to use the repository, we will delete your user account upon request. The published datasets, the associated metadata and the licence agreement on which the data publication is based will continue to be stored at TIB. Your data will not be transferred to institutions outside the TIB. The only exception to this is the metadata based on the DataCite Metadata Schema, which is recorded in the course of DOI allocation and transmitted to DataCite.
